

Langley Research Center Safety Alert

SA-06-91

Date: March 18, 1991

TO: All Facility Safety Head
All Facility Coordinators

FROM: 429/Safety Manager, Head, Safety Engineering Branch, SSQRD

SUBJECT: Environmental Questionnaire

The Clean Water Act prohibits unregulated discharges to United States waters. To ensure compliance the Environmental Protection Agency, working through the Virginia State Water Control Board, requires that all discharges to waters of the United States be regulated under a permit. Each outfall at the Center is permitted and all point source discharges must be identified and listed on the permit, at least in general categories.

This questionnaire must be completed as accurately as possible so that we can comply with State and Federal regulations, since we will use this information to modify our permit. Facility Safety Heads are requested to complete the questionnaire on the back of this announcement and return to this office, Attn: Mail Stop 429/SEMS, by April 15, 1991. Questions regarding this activity should be directed to Mr. Jan Benson at extension 43320.
